## W & V Mountings

W and V type mountings are ideal for use in both compression and shear.

The profile of the rubber section allow for high levels of deflection to be achieved at low loads.

## Advantages:

- Ideal for Lightweight Equipment
- Protect Sensitive Equipment from Shock
- Easy to Install

## Applications:

- Small Generators
- Slow Speed Machines (Fans etc)
- Electronics
- Shock Protection Units

Part No	Compression		Shear	
	Max Load Kg	mm	Max Load Kg	mm
W7230-40	40	5	19	10
W7230-55	65	5	30	10
W7230-70	100	5	48	10
V3630-40	17	5	7.5	10
V3630-55	30	5	19	10
V3630-70	40	4.8	25	10

 $\ensuremath{\mathsf{Max}}$  compression load in Kg deflection in mm.
